Project Information

Project Name:

Village of Midlothian Overhead Water Tower

Amount Requested:

\$1,500,000

Project Description:

Project Description:

Construct an Overhead Water Tower in the Village of Midlothian to provide consistent, reliable water pressure, increase storage capacity, and enhance fire protection. IEPA has identified the lack of an Overhead Water Tower as a deficiency in our system for many years. The Village has experienced 2 boil orders in the past 12 years which could have been prevented with an Overhead supply. Power failures create pressure surges in the system which in turn cause water main breaks. The Village has spent \$850,000 acquiring property, rehabilitating the Pump Station, installing the transmission main to the site and completing preliminary engineering. The project is shovel ready. The Village will match funds 20% by providing construction engineering and observation.

Intended Recipient of Funds

Village of Midlothian

14801 Pulaski

Midlothian, IL 60445

Explanation of the request:

The Village of Midlothian is requesting 1.5 million dollars of federal assistance to construct an Overhead Water Tower in the Village of Midlothian to provide consistent, reliable water pressure, increase storage capacity, and enhance fire protection. IEPA has identified the lack of an Overhead Water Tower as a deficiency in our system for many years. The Village has experienced 2 boil orders in the past 12 years which could have been prevented with an Overhead supply. Power failures create pressure surges in the system which in turn cause water main breaks. The Village has spent \$850,000 acquiring property, rehabilitating the Pump Station, installing the transmission main to the site and completing preliminary engineering. The project is shovel ready. The Village will match funds 20% by providing construction engineering and observation. The project will enhance and sustain the quality of the life for the residents of the Village

of Midlothian and ensure safe, reliable source of potable water in to the foreseeable future.
